

Master Sensor Thermocouple

Thermocouple R/S

Master Sensor

GENERAL

These are noble metal thermocouple. Their temperature ranges are 0 to 1600°C. Sensitivity between 6 and 12µV/°C for S type and for R type between 6 and 12µV/°C also.

FEATURES

- ✓ High accuracy and stabilization
- ✓ Cost Effective solution
- ✓ Manufactured and tested under strict quality control standards

SPECIFICATIONS

Temp Range : Upto 1500°C

Accuracy : Special, Class 1

Element : PT-RH/PT

Element Dia/Insert Dia : 0.5/6 MM

Length : 450 MM

End Connection : Flying leads/Connector

Cable Length : 1000 mm

Calibration : Calibration Certificate from NABL Accredited Laboratory shall be provided.
